

Unparalleled Peace of Mind

A 50-Year Warranty On Niches and Urns For Your Peace-of-Mind

Infinity Memorial Systems® manufactures quality products and backs them with a limited warranty that gives churches confidence in their columbarium investment.

Infinity Memorial Systems® base, niche and cap units are warranted for 50 years as are Infinity Urns®. No other columbarium system provides as comprehensive a warranty at even a fraction of the same duration. Why Such a Strong Warranty?

The materials used to manufacture Infinity Memorial Systems® cremation products have been extensively tested by our research department and independently by a major state university and a federal national laboratory for durability and structural integrity. Infinity Urns®;

For example, a filled and sealed Infinity Urn® was placed on a concrete surface and a full-size front loader was parked on it without damage to its structural integrity. The urns are designed to withstand the ravages of weather, extreme climates and ground burials. That is why we warranty that remains will remain contained for at least 50 years. The urn end caps are engraved with identifying information so that proper memorialization is ensured. Niches

Infinity Memorial Systems® niche, cap and base blocks are also covered by our unparalleled 50-year warranty. Though the finishes on these elegant niche products look just like natural stone, they will not be affected by weather and climate like other materials used to build old-fashion columbaria. What's more, the the surfaces of stone will pit, dull and even crumble due to exposure to the elements - often requiring resurfacing, removal of surfaces or outright replacement of materials or entire structures. With Infinity Memorial Systems® products, columbarium niches are restored to a like new finish with a simple buffing and polishing.
