

Modular, Compact and Versatile

The Infinity Memorial Systems® is the most versatile columbarium available because niches are designed according to the changing needs of the church. Installation is simple and quick and niches can be configured for expansion, relocation or changes in design. • Classic niche finishes and memorial marker plates provide an array of design options that compliment any interior or exterior location.

• Columbaria consist of 9-niche blocks that are easy to transport.

• Base and cap blocks are used to raise niches above ground level and complete the tops of columbaria.

• Precision manufacturing makes assembly easy and ensures sturdy structures.

• Niche, base and cap blocks can be easily disassembled to add more niches, change designs or relocate columbaria.

Assembly and Construction Installing an Infinity Systems Columbarium® is simple and quick. The unique ColumLock system is so easy that anyone can build a niche structure (though our distributors install systems free of charge). 2 base blocks (12" x 12" x 16" each), 2 cap blocks (2" x 12" x 16" each) and 2 niche blocks (12" x 12" x 16" with 9 niches each) create a stand alone system with 18 niches that can be easily expanded or relocated. Expansion, Reconfiguration and Relocation Any design, configuration or location imaginable can be installed or relocated according to the current needs of your church. Your Infinity Memorial Systems® consultant can help you plan and design your columbarium for current and future needs.
